

# INTUGO'S TECHNICAL GUIDELINES

## Towards a New Normal

### What is a New Normal?

It is a gradual regulation of social, labour, economic, educational and cultural activities.

A more humane and supportive coexistence.

A new relationship with the urban space.

A more equitable society that privileges the most vulnerable and the right to a healthy life.

A different way of relating to the environment that causes less impact on it.

### Our Goal

Being a company that acts in a safe and responsible within our properties, in order to mitigate the risks of contagion or transmission of COVID-19 among our collaborators, suppliers and/or visitors.

Access to Facilities

Operational Areas

Common Areas

## Overall control strategies

A. Health Promotion.
